

## **ABSTRACT**

### **"STANDARD PROTECTOR FOR TINNED DRINKS"**

**OBJECT OF THE INVENTION:** The descriptive report herein refers to an Invention Patent application, related to a standard PVC or PET tinned drinks protector with its corresponding opening seal, the obvious aim of which is to form a protective element for the top of drinks tins, the area where users place their lips to drink from the container.

As the invention (protective cap) hermetically seals the top of the drinks tin and is fitted during the packaging process, it guarantees that the area from which the user drinks is perfectly clean and hygienic.

**FIELD OF THE INVENTION:** This invention has its application in the food industry and drinks packaging at source, owing to its efficiency and simplicity of application.

**ANTECEDENTS OF THE INVENTION:** On the part of the applicant there is no knowledge of the existence at present of an invention designed to be a standard protector with seal for tinned drinks.
